Washing instructions for the First Responder Face Shields including the new Runner and Sports Version

Use an open container as shown with one and a half gallons of hot water and one tablespoon of Palmolive or other mild dishwashing soap. Immerse the Face Shield and wash away any dirt or stains with a soft brush or wash cloth. After thoroughly washing the complete face shield, rinse in clean, clear water and hang to air dry.

If washing the Runner and Sports Version Face Shield, dip the polycarbonate clear face section in the same soap formula but use only **cold** water. Do not rinse this version off again. The remaining soap film will help to reduce fogging. Hang to air dry.
